

Announcement and Call-for-Papers

ACM Transactions on Privacy and Security (TOPS)

Dear Colleague:

The *ACM Transactions on Information and System Security* (TISSEC) has been devoted to the study, analysis, and application of information and system security since 1998.

Starting with the first issue of Volume 19, TISSEC will expand to include the area of privacy and data protection. To reflect this broader coverage, the journal will be changing its name to ***ACM Transactions on Privacy and Security (TOPS)***. Its mission is to publish the best original research in these areas. Submitted papers should have practical relevance to the construction, evaluation, application, or operation of security or privacy-critical systems and applications. Theoretical papers must make convincing arguments for the practical significance of their results. Tutorial or survey papers will not be considered for publication.

Researchers are encouraged to submit their work to TOPS. For the expanded scope and submission information, please visit <http://tops.acm.org>, or write to admin@tops.acm.org.

David Basin
Editor-in-Chief
